# FROM MAINTENANCE

## Cable Trippers

If you have TV or telephone cable crossing stairs or walkways, please remove them immediately. Per your lease agreement, cables are not permitted to be run in a manner that may cause a tripping hazard. Cables are to be fastened to the baseboard and door frames by use of cable tacks ("U" shaped tacks). Cables are to be run up and around door frames and NOT across walkways. If you could trip over it, then it is improperly installed. Improperly installed cable will be removed by maintenance and the cost charged to the tenant. New or existing cable will not be re-installed causing you the loss of use of the TV or telephone served by the cable. Avoid this major inconvenience by properly installing your cable now.

## Heat Start Up in The High Rises

The Maintenance Department will be turning the heat on in Walnut and Potomac Towers early October, depending upon the weather. Before you call Maintenance for service this heating season, make sure the room temperature is below 66 degrees. If the temperature is 66 degrees or above and you call for service, you will be charged for the call. Overtime callouts are very expensive and you can avoid these charges (\$88.74) by checking the temperature before you call. Do not force the thermostat knob beyond the limit on the thermostat. Remember, using your oven or stove as a source of heat is a lease violation. It poses a serious health risk to you. This misuse may also result in damage to your stove (melted knobs) for which you will be charged.

## Use A Flashlight To Check For Bed Bugs

- Look for bed bugs hiding in the mattress, box spring, and bed frame
- Check under the mattress and along the seams (edges) of the mattress
- Look for small, reddish spots on the mattress- they could be signs of bed bugs.
- Search other furniture near the bed like night stands.
